

A Better You at any Age!

Greska's Carbon-60

Natural Health Solutions Carbon 60 in Water or Oil Suspension

Greska's Carbon-60™ is a certified food-grade Carbon 60 ("C60") dietary supplement. It is odorless with minimal taste and is taken orally or applied on your skin.

Greska's Topical Mist is the same bio-available C60 in a colloidal water-based suspension, not a dissolved solution. Mist on your skin, joints, and muscles to **Mist Away Your Pain!** It helps to reduce fine lines and wrinkles.

— HOW IT WORKS —

Health experts agree that excessive free radicals and toxins are the common denominators for most all health issues. These electron-deficient molecules impair healthy cellular function by stealing electrons from neighboring cells, causing a disruptive oxidative stress chain reaction. Oxidative stress can cause low energy, joint discomfort, mental fog, and dysfunction of bodily cells.

Greska's Carbon-60™ provides electrons to molecules **eliminating oxidative stress** by stabilizing free radicals. C60 also neutralizes electron-deficient toxins, rendering them harmless while detoxifying the whole body at the cellular and mitochondrial levels supporting healthy cell functions.

Carbon 60 is a powerful antioxidant that reduces inflammation and supports healthy joints and athletic performance while supporting healthy aging, increased energy, and mental clarity.

— ADDED BENEFITS OF SUNFLOWER OIL —

Greska's Carbon-60 takes advantage of blending the benefits of sunflower oil into their carbon 60 product. Our cold-pressed, solvent-free processed sunflower oil is rich in good Omega 6. It also contains vitamins E, A, C, and D and fatty acids that act as antioxidants to regenerate new skin cells and effectively treat acne. The vitamin E and oleic acid in Carbon-60 sunflower oil can help **reduce the appearance** of fine lines and wrinkles. Sunflower oil has **anti-inflammatory** properties that can help lower skin redness and roughness. [1]

— WHY BUY GRESKA'S? —

Greska's Carbon-60™ is a **third-party tested** and certified **Food-Grade**, clean Carbon 60 supplement. [1] We Nano-Blend™ our Carbon 60 powder into non-GMO, cold-pressed, organic sunflower oil in our **Certified Good Manufacturing Practices** facility. We pack and ship all our orders from our fulfillment facility in Littleton, Colorado.

Health Energy Vitality

How To Use

Oral Use: Greska's Carbon-60 oil is taken orally, directly into the mouth, with or without food, mornings preferred. Give the rubber dropper two good squeezes, one to clear the pipette, then a second squeeze to fill it two-thirds full for one serving.

Topical Mist: Spray on skin (one to five sprays as needed) and allow to dry.

Topical Roll-On: Roll product on your skin.

Greska's for Pets: Squirt on food. See chart.

Serving
Size

Pet Weight Chart

0-15 lbs	1 squirt
15-35 lbs	2 squirts
35-60 lbs	3 squirts
60-100 lbs	4 squirts
+100 lbs	5 squirts

WHY GRESKA'S CARBON-60

Greska's Carbon-60 powder conversion process is the only C60 conversion process to produce a clean Carbon 60 in small 20 nanometer spheres. These small spheres allow for a colloidal suspension in oil and water.

Scientific Breakthrough: Greska's proprietary non-solvent Carbon 60 conversion process creates Carbon 60 spheres approximately 200,000 times smaller than the antioxidants found in foods like red wine, berries, and dark greens, making them vastly more bio-available and more effective. These molecules are small enough to enter the cell where many toxins are trapped. The Carbon 60 molecules readily penetrate the skin, muscles, ligaments, bones and organs, Carbon 60 works at the mitochondrial level in each cell, supporting a healthier you.

"Order Today! You will be glad you did."

Bob Greska

Third-party independent laboratory tested, and verify for the quality, presence, and lack of contaminants in Greska's Carbon-60 powder. ([1] www.C-60.com/certs/).

There are no known adverse interactions or contraindications of Greska's Carbon-60 with any medications or supplements.

Allergen Warning: Our bulk oil is processed in a facility that produces peanut oil.
